## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by the Japanese Patent Abstract 2003-322355 (Yamano); prior of record (see IDS filed 01/23/2006). The JP Patent Abstract discloses an air conditioner indoor unit comprising: an outer shell, base (2), a front cover (8) having fanciness, a light emitting part (providing luminous feature), the said front face is transparent and the transparence member can perform coloring (see page 4). In regards to claim 3, the front side appears substantially flat (see figure). Furthermore the front is only transparent, therefore inherently the base & sides are deemed made of non-transparent material.
